

Android Spotube: Queue Naina Zara

Task

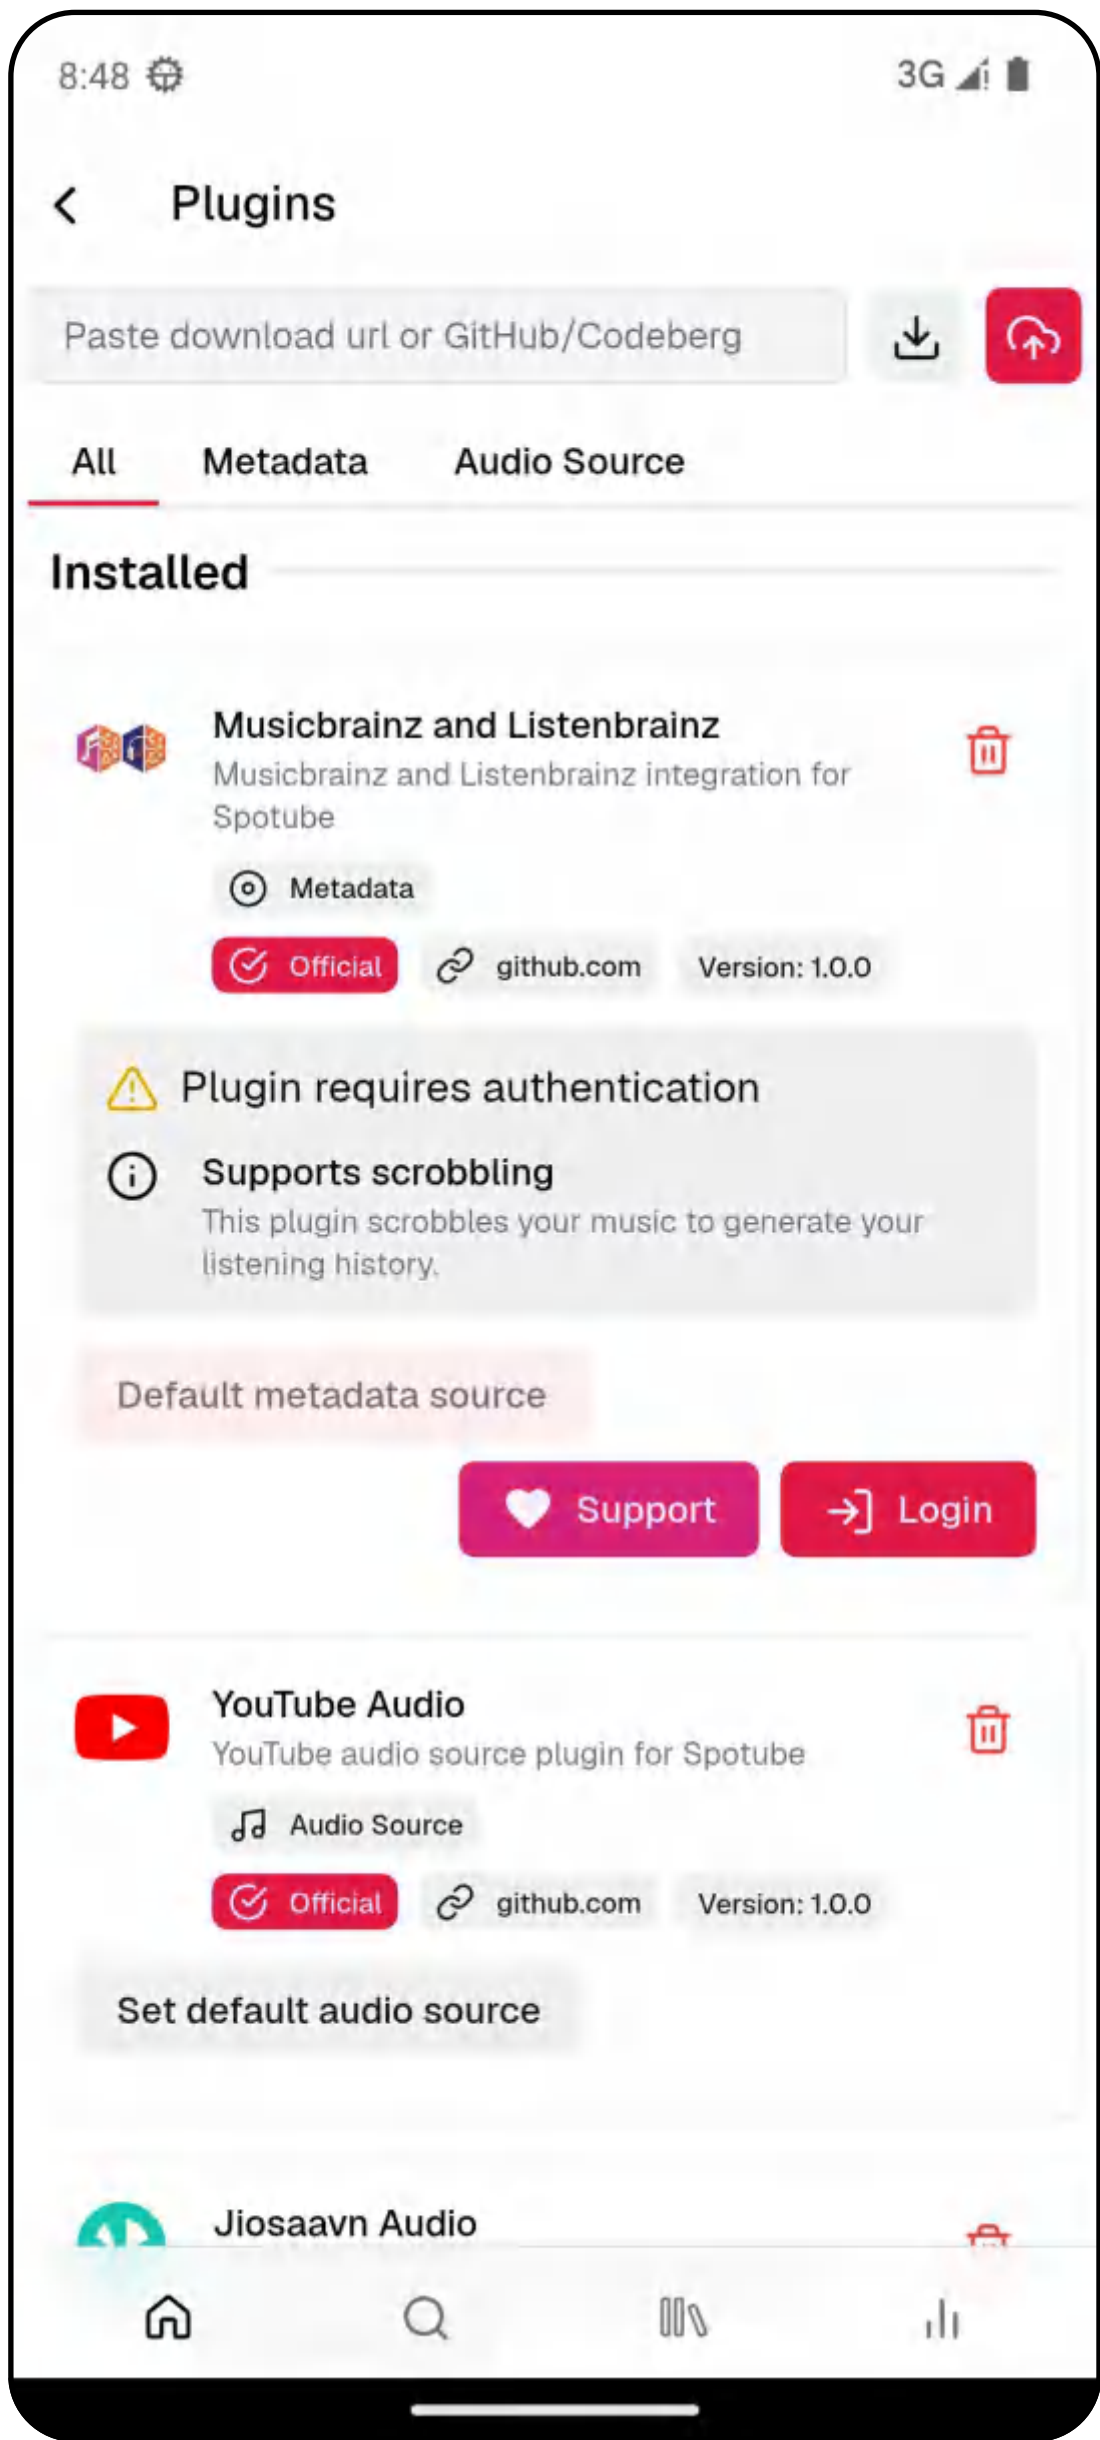

task_id:
android.spotube.queue_naina_zara

Platform: Android

App: Spotube

Task instruction

In Spotube, make Jiosaavn Audio the selected audio source, set Language to English and Marketplace Region to Austria, then build one queue in this exact order as closely as the app allows: Naina, Zara Zara, Do not stop after only Naina and Zara Zara, do not use a YouTube-only source, and do not leave the final screen on Search or Settings.

Android Tasks Org. : Create Task With Subtasks

Task

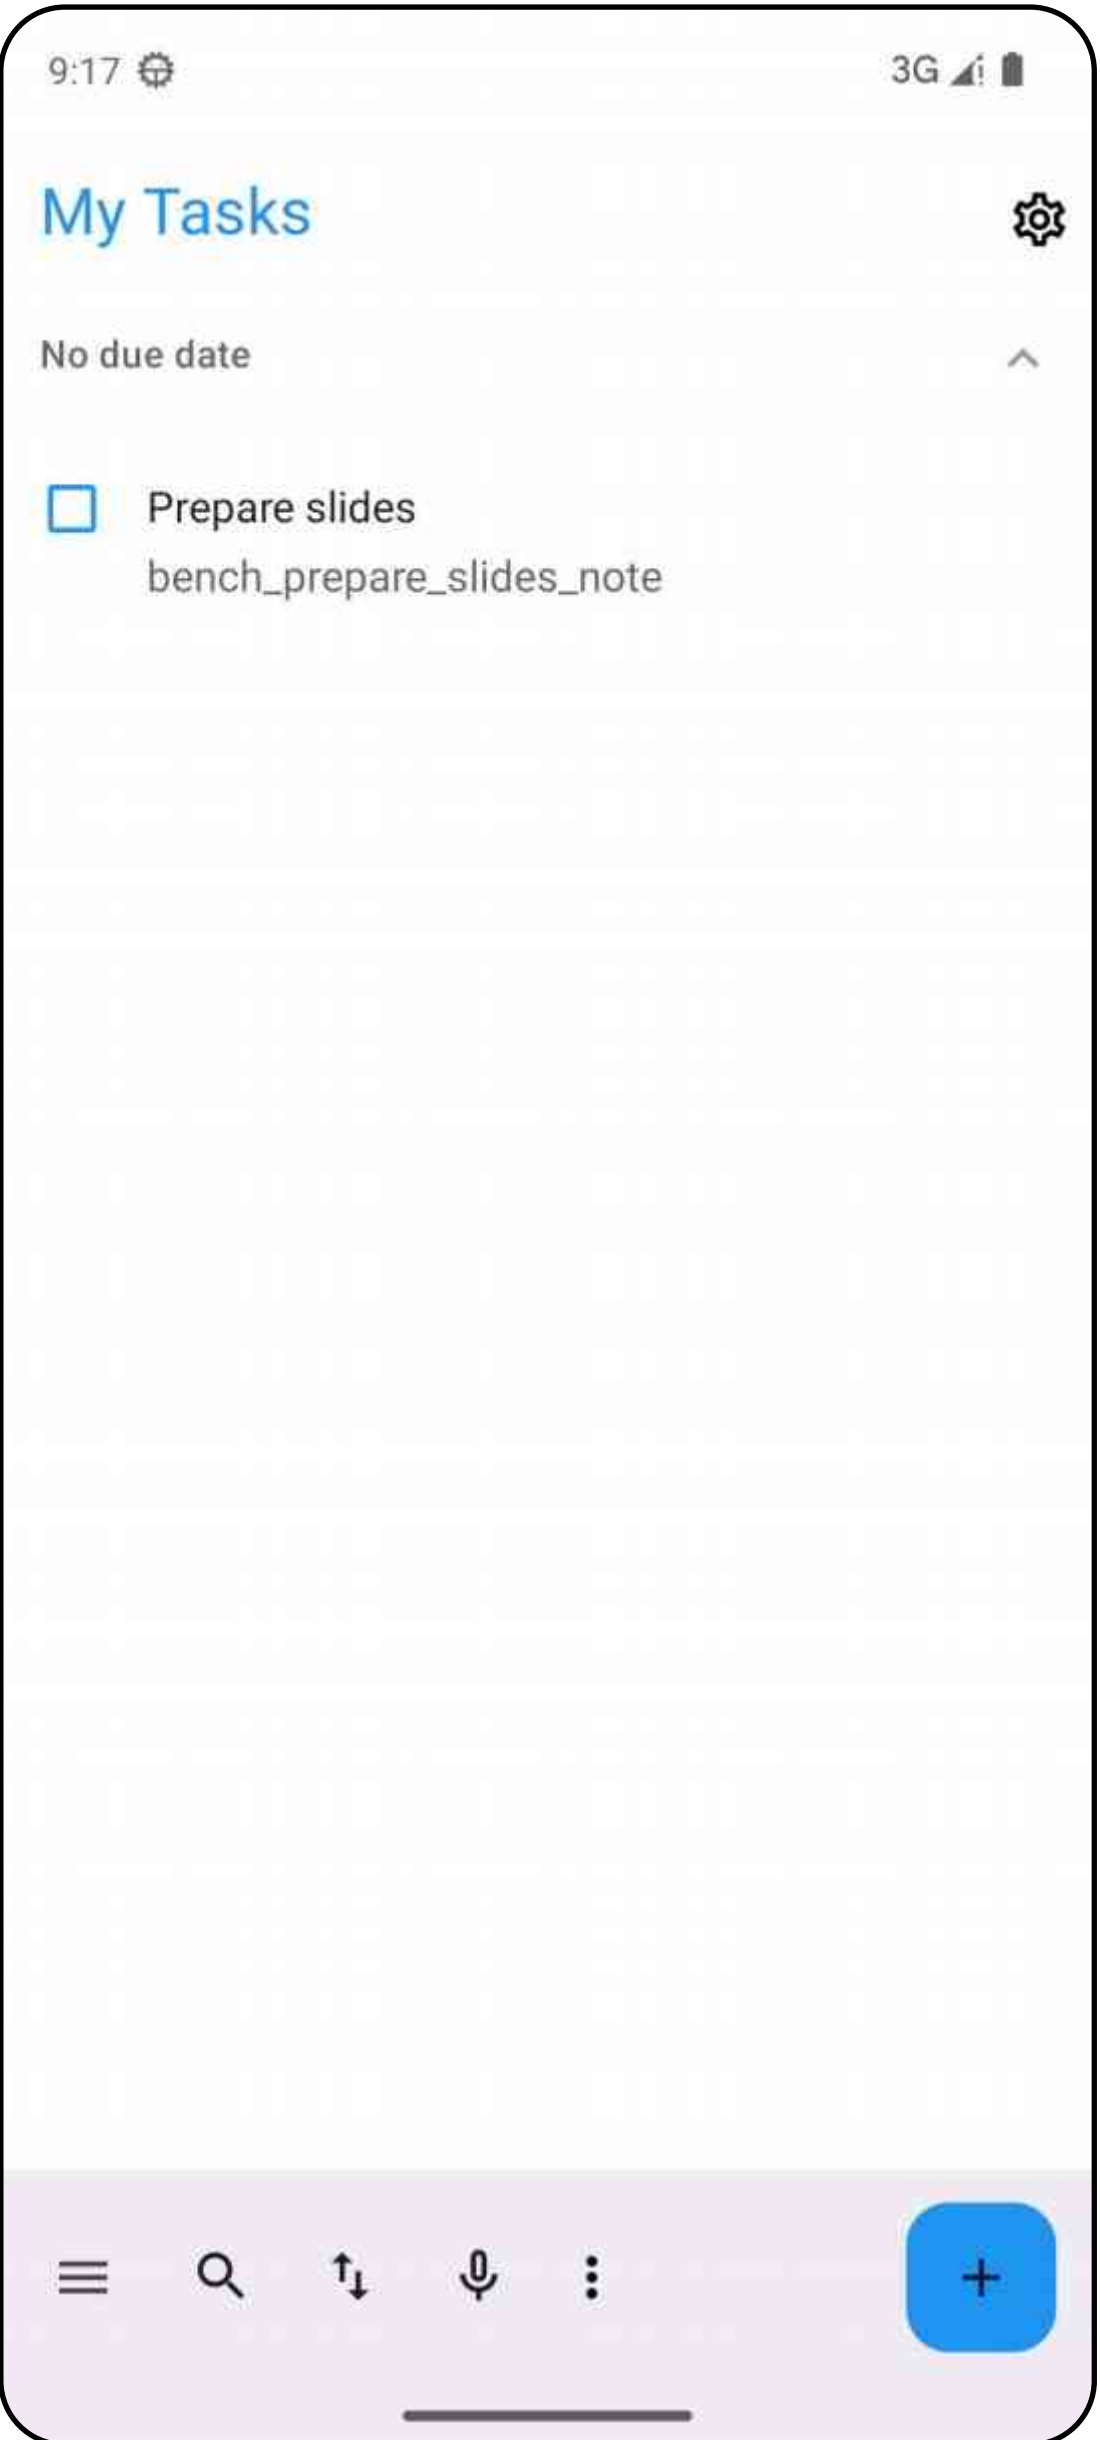

task_id:android.tasks_org.create_task_with_subtasks

Platform: Android

App: Tasks Org.

Task instruction

In Tasks.org, the list already contains seeded weekend-errand decoys. Delete exactly the stale top-level task Weekend errands - duplicate charger draft.
.....
bench_weekend_errands_note_v5 / route=blue owner=family window=Sat-09:30 /
Do not create duplicate subtasks, reminders, completed tasks, or any other top-level task.

Android Material Files: Rename

Task

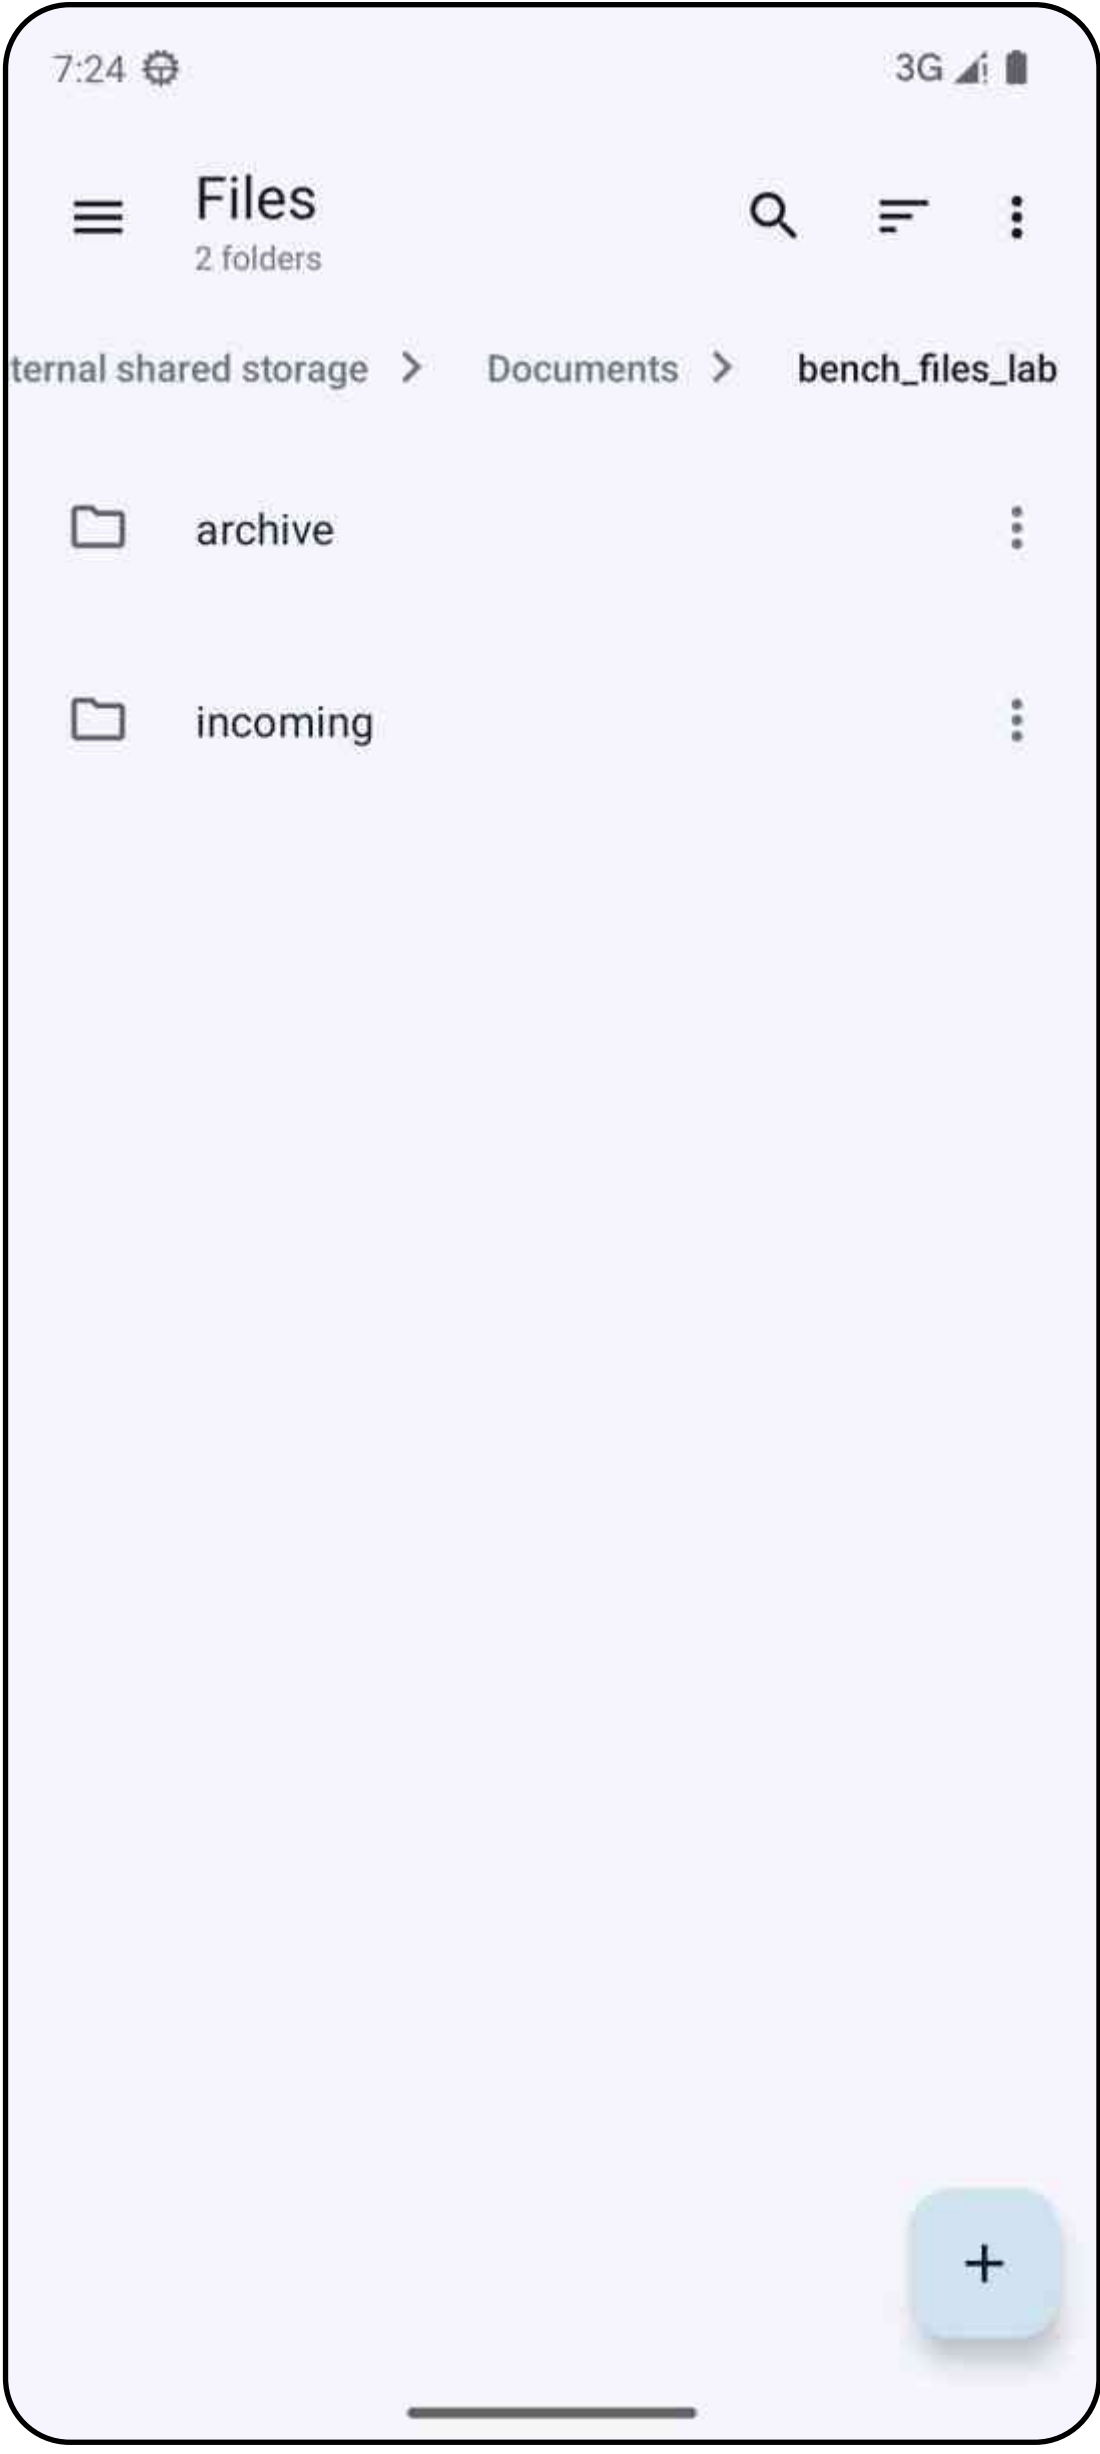

task_id:
android.material_files.rename_file

Platform: Android

App: Material Files

Task instruction

In Material Files, open incoming/ rename_instructions.txt inside the benchmark files workspace and apply only the FINAL BLUE batch. Ignore the DRAFT, HOLD, BACKUP,
keep the remaining final files inside incoming, and delete rename_instructions.txt when finished. Do not delete, rename, or move any hold/backup/draft file.

Android Fossify Calendar: Reorganize schedule

Task

task_id:android.fossify_calendar.reorganize_schedule_hard

Platform: Android

App: Fossify Calendar

Task instruction

Please clean up the BMK schedule in Fossify Calendar. The event BMK Candidate Alpha contains the final routing plan in its description. Apply that plan exactly, delete the candidate/draft BMK events that the plan says are obsolete, preserve the hold event it says to preserve, and create every final BMK event named in the plan. Ignore any conflicting candidate event titles or old draft details.
