

Linux-GIMP

Task

task_id:

linux.gimp.convert_grayscale

Platform: Linux

App: GIMP

Task instruction

Open /tmp/helloworld gimp/input.png in GIMP. Convert the image to grayscale through ImageMode → Grayscale. After conversion, use File → Export As to save the result at /tmp/helloworld gimp/gray.png as a PNG file. Complete any required export confirmation step, then stop once the file has been saved.
