

Error case Chat-to-Template Mapping Error in Delta Chat

task_id: macos.deltachat.support_escalation
Platform: macOS
App: Chat
Difficulty: hard
Tags: macos, messaging, information-extraction, multi-chat

Task instruction
In Delta Chat, use the seeded chats to extract the ticket ID, error code, escalation owner, and deployment window, then send the required escalation updates to Support Desk, Malik, and Ops Sprint using the specified chat-specific templates.

Run Result
Model: GPT5.5
Action mode: reflection_pyautogui
Observation mode: screenshot_only
Steps: 6
Initializer: PASS
Evaluation: FAIL
Overall status: FAIL
Failure reason: The agent correctly extracted all required slot values but failed to maintain the chat-to-template mapping. It sent an extra Ops Sprint-style escalation message in Support Desk, making the latest message in that chat incorrect.

Error case Android Quickshop:Home Refresh Checkout

task_id: android.quickshop.home_refresh_checkout
Platform: Android
App: Quickshop
Difficulty: Difficult
Tags: Android, Quickshop, refresh

Task instruction
In QuickShop, sign in with phone 13800138000 and password spring2026. Build a home-refresh order from the final checklist, not the draft checklist: Garden White Cotton Bedding Set 1.8m with the 200x230cm spec quantity 2,....., Mountain Isle Pour-Over Coffee 20 Pack with the 20 sachets spec quantity 1...final: bedding x2, backpack, coffee, stand.', and place the order.

Run Result
Model: GPT5.5
Action mode: reflection_pyautogui
Observation mode: screenshot_only
Steps: 100
Initializer: PASS
Evaluation: FAIL
Overall status: FAIL
Failure reason: QuickShop local state did not match expected outcome: order count expected 1 but got 0, and the orders list was empty.
